

Logix4Dream

UNIT4's groundbreaking self-service reporting and analysis solution

A unique visual analysis solution, which enables you to unlock and instantly question your data right now. No more waiting; a truly self-service application, providing the answers you need – when you need them!

Unlock data value...

Dream users tell us that one of the biggest challenges in their organisations today is how to maximise the value of the vast amounts of information captured across their databases, departments and projects – without spending needless amounts of time and money on long-running BI projects.

Logix4Dream is a self-service solution developed specifically to enable users of all ability levels to interact visually with key business information. Using simple drag-and-drop actions, users can get answers to their ad hoc questions with ease.

...with better answers – for everyone

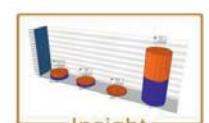

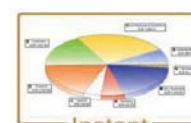

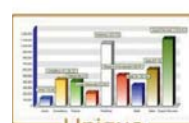

Data is displayed in a unique spreadsheet-like environment that users will find familiar, simple to use and easy to understand. Users are up and running in minutes.

In addition, this intuitive interface allows users to question their data with ease, while dynamic charting provides immediate visual feedback.

Wasted time is wasted money. Logix4Dream allows your questions to be answered, presented and acted on faster - reporting and analysis requirements are fulfilled, without the need for spreadsheets, the creation of customised reports or hours of technical assistance.

Key Benefits

- **Place self-service analysis** in the hands of those who know their data best.
- **Radically improve time to decision** without waiting on others to generate the required analysis.
- **Share insights instantly** with your team, partners, suppliers and customers.
- **Eliminate costs and delays** incurred in designing and developing custom reports.
- **Get a single view** of information from all your applications in a single, intuitive interface.
- **Increase return on investment** by making the data held in your applications work; unlock the value hidden within your company.

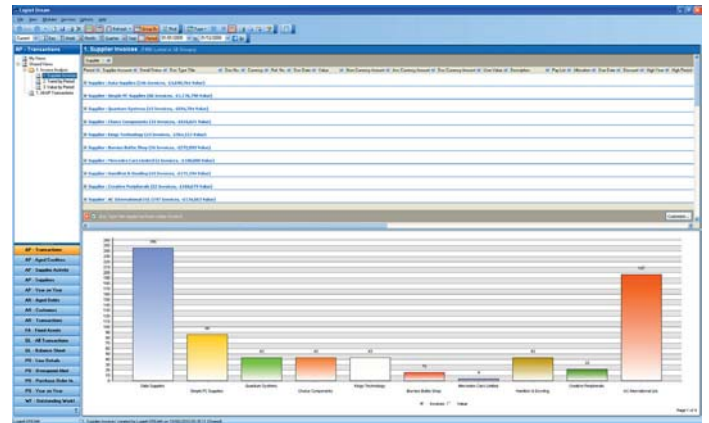

Logix4Dream in action

- **Self-service analysis** – Logix4Dream empowers the user to answer questions themselves, without reliance on others.
- **Quick out of the blocks** – Logix4Dream’s familiar look and feel has users up and running in minutes.
- **Instant results** – Logix4Dream arrives on your desktop with pre-configured data views for all your Dream applications, which allows for rapid implementation and a rapid return on investment.
- **Instant visualisation** – Logix4Dream gives users “Headline” analysis through traffic lights and trend arrows, which offers easy KPI monitoring with drill down to the underlying data.
- **Low impact** – Logix4Dream requires no dedicated hardware and incurs no installation down-time.
- **Designed for compatibility** – Logix4Dream is designed to be as lightweight as possible. It works with Dream, as well as any other SQL server, Oracle or OLEDB-compliant database and it can also use ODBC to interrogate data on those older but still highly critical systems you may have tirelessly working behind the scenes.

“Having seen Logix4, I recommend fellow UNIT4 users have a look at this very clever analysis reporting tool for themselves.”

Ian Sibbald, Financial Controller, Cranfield University

About UNIT4

UNIT4 is a global business software company that creates, delivers and supports adaptable software and services worldwide, to help dynamic organisations manage their business needs effectively. We strive to set the global standard for business solutions that help dynamic organisations to embrace change – simply, quickly and cost effectively.

About Dream

Dream – UNIT4’s award winning unified Ledger accounting system – enables growing businesses to achieve the transparency they need, improve efficiency and drive an informed approach to decision making.

The latest release of Dream, version 3.4, automates more processes than ever before, enabling major time and cost savings. And it easily interfaces with other business applications to deliver the best possible business value from your broader IT investment too. If you haven’t yet looked at the content of Dream 3.4 or are interested in upgrading, but haven’t yet started, then contact us for details on the upgrade path to 3.4 today.
